

How to choose the size OF YOUR RING

- Woman -

| Size | 48 | 50 | 52 | 54 | 56 | 58 | 60 | 62 |
|---------------|--------|--------|--------|--------|--------|--------|--------|--------|
| Circumference | 48mm | 50mm | 52mm | 54mm | 56mm | 58mm | 60mm | 62mm |
| Diameter | 15,3mm | 15,9mm | 16,6mm | 17,2mm | 17,8mm | 18,5mm | 19,1mm | 19,7mm |

For information, if the measurement found is between two intermediate sizes (e.g. 51), we advise to take the size above (size 52 in this case).

Print out the size guide at 100% A4 size and cut out the measuring ring. Place the ring gauge around your finger to read your size.

Position a ring (in which you feel comfortable) on the different circles until it matches your ring perfectly. It should not disappear behind your ring but follow the inside without leaving any space:

Wrap it around your finger, making sure it fits snugly

Mark the length on a ruler and measure the resulting distance to the nearest millimetre
